

Tandem Gorge Swing: Take the Freefall Together

DURATION**1 Hour****FROM****USD 201 per person****MINIMUM****3 travellers**

The Batoka Gorge swing run as a pair, clipped into the same system and stepping off together. The same freefall and the same long arc across the gorge, with someone beside you for the part that is hardest to do alone.

Itinerary

1**Pairing and harnesses***Zimbabwe*

Both of you are fitted into full body harnesses and the crew set the tandem rig, which links you to a single rope. Combined weight is checked, because it changes the drop and the arc. The crew brief you together so you both hear the same count.

2**At the edge, side by side***Zimbabwe*

You are walked to the launch point and positioned together. The practical difference from the solo swing is that you have to go at the same moment, which most pairs find makes it easier rather than harder.

3**The drop and the arc***Zimbabwe*

A true freefall first, then the rope loads and swings you both out across the gorge in a long pendulum. A tandem carries more weight than a solo run, so the swing is correspondingly longer and heavier through the bottom of the arc.

4**Recovery***Zimbabwe*

You are winched back up to the rim together and unclipped at the top. Photography is available. Couples, siblings and anyone talking each other into it tend to book this one.

What's included

- Safety gear
- Instructors

Not included

- Photos
- Gratuities
- Park fees
- Transport

What to bring

- Good health
 - No fear of heights
-
